	Associated Certification Criteria: §170.315(f)(3) Transmission to public health agencies	es — reportable laboratory tests and value/results	
	Measure Description: Create and transmit HL7 lab result messages to public health agency.		that would generally provide the most public health benefit. State agencies provide e, epidemiologists and government for identifying disease outbreaks, epidemics and even
	Metric Description: 1) 100 percent of HL7 Reportable lab messages successfully sent and acknowledged (via HL7 ACK) by public health agency 2) 100 percent of reportable lab messages successfully received and processed by public health agency based on either: a) Logging into agency web site and validating, or b) Using a report provided by agency		Standards Implemented: + HL7 2.5.1. Implementation specifications. HL7 Version 2.5.1 Implementation Guide: Electronic Laboratory Reporting to Public Health Release 1 (US Realm) • Errata and Clarifications and ELR 2.5.1 Clarification Document for EHR Technology Certification • § 170.207(a)(3) International Health Terminology Standards Development Organisation (HTSDO) Systematized Nomenclature of Medicine Clinical Terms (SNOHED CT®) International Release July 2012 and US Extension to SNOMED CT® March 2012 Release • § 170.207(c)(2) Logical Observation Identifiers Names and Codes (LOINC®) Database version 2.40, Released July 2012, a universal code system for Identifying laboratory and clinical observations produced by the Regenstrief Institute, inc. • HL7 v2.5.1 is Electronic Laboratory Reporting to Public Health (US Realm), Release 1 Errata and Clarification Document for EHR Technology Certification, July 16, 2012 § SNOMED CT® OID: 2.16.840.1.113883.6.96 § LOINC® OID: 2.16.840.1.113883.6.1 [see also 80 FR 62612]
	Developer Info: Empower Systems 1200 Harger Road, Suite 408 Oak Brook, IL 60523 (305)766-3245	Product Info: Product Name: Empower Inpatient+Ambulatory Product Version: 1.1.57	Methods Use to Demonstrate Interoperability: 1) Table of reportable lab tests based on LOINC® Code
	Care Setting: Typically, hospitals and free-standing laboratories are required to report laboratory tes results to reportable lab reporting agencies. Since Empower Systems does not market software to free-standing laboratories, we've chosen the hospital care setting for (f)(3) real world testing. Nost hospitals with labs are required to report lab results for certain tests to their state reportable lab department. Real World Testing URL: https://www.empower.md/real-world-testing/		
Test Step:	Testing Procedure:	Expected Outcomes:	Key Milestone Key Outcomes: Comment(s)
1	Identify Empower Client who: - Has a state agency that can receive reportable lab data - Already has a functional reportable lab (ELR) interface or would like to implement one to their agency	Client test partner selected	May, 2023
	 Already has a functional reportable lab (ELR) interface or would like to implement one to their agency 		ELL OF
2	 Already has a functional reportable lab (ELR) interface or would like to implement one to their agency Implement send-only reportable lab interface (if interface not already in place) 	Lab interface is functioning as expected	FALSE June, 2023 FALSE
2	Implement send-only reportable lab interface (if interface not already in place) Determine whether test or production interface will be used	Lab interface is functioning as expected Environment and patient selected	
_	Implement send-only reportable lab interface (if interface not already in place)	3,	
3	Implement send-only reportable lab interface (if interface not already in place) Determine whether test or production interface will be used If production, determine whether an actual patient or a test patient will be used	Environment and patient selected	
3 4	Implement send-only reportable lab interface (if interface not already in place) Determine whether test or production interface will be used If production, determine whether an actual patient or a test patient will be used Create a new patient encounter and orders for lab tests	Environment and patient selected Confirm encounter and order	
3 4 5	Implement send-only reportable lab interface (if interface not already in piace) Determine whether test or production interface will be used if production, determine whether an actual patient or a test patient will be used Create a new patient encounter and orders for lab tests Register a patient or create a new patient "A" in Client EHR and create a current patient encounter	Environment and patient selected Confirm encounter and order Confirm patient and encounter	
3 4 5 6	Implement send-only reportable lab interface (if interface not already in place) Determine whether test or production interface will be used If production, determine whether an actual patient or a test patient will be used Create a new patient encounter and orders for lab tests Register a patient or create a new patient "A" in Client EHR and create a current patient encounter Enter one or more orders for laboratory tests	Environment and patient selected Confirm encounter and order Confirm patient and encounter Confirm order(s) are entered	
3 4 5 6 7	Implement send-only reportable lab interface (if interface not already in piace) Determine whether test or production interface will be used if production, determine whether an actual patient or a test patient will be used Create a new patient encounter and orders for lab tests Register a patient or create a new patient "A" in Client EHR and create a current patient encounter Enter one or more orders for laboratory tests In Client Laboratory Information System (LIS), result these tests. Make note of the LOINC code(s) for each result to determine whether each code is present in the list of	Environment and patient selected Confirm encounter and order Confirm patient and encounter Confirm order(s) are entered Confirm tests have been resulted Record LOINC code(s) and confirm in list of reportable	
3 4 5 6 7 8	Implement send-only reportable lab interface (if interface not already in place) Determine whether test or production interface will be used if production, determine whether an actual patient or a test patient will be used Create a new patient encounter and orders for lab tests Register a patient or create a new patient "A" in Client EHR and create a current patient encounter Enter one or more orders for laboratory tests In Client Laboratory Information System (LIS), result these tests. Make note of the LOINC code(s) for each result to determine whether each code is present in the list of reportable codes.	Environment and patient selected Confirm encounter and order Confirm patient and encounter Confirm order(s) are entered Confirm tests have been resulted Record LOINC code(s) and confirm in list of reportable codes	
3 4 5 6 7 8	Implement send-only reportable lab interface (if interface not already in place) Determine whether test or production interface will be used If production, determine whether an actual patient or a test patient will be used Create a new patient encounter and orders for lab tests Register a patient or create a new patient "A" in Client EHR and create a current patient encounter Enter one or more orders for laboratory tests In Client Laboratory Information System (LIS), result these tests. Make note of the LOINC code(s) for each result to determine whether each code is present in the list of reportable codes. Make sure LIS generates HL7 ORU (Result) messages for each patient who has a lab result	Environment and patient selected Confirm encounter and order Confirm patient and encounter Confirm order(s) are entered Confirm tests have been resulted Record LOINC code(s) and confirm in list of reportable codes Confirm results messages for each patient	
3 4 5 6 7 8 9	Implement send-only reportable lab interface (if interface not already in place) Determine whether test or production interface will be used if production, determine whether an actual patient or a test patient will be used Create a new patient encounter and orders for lab tests Register a patient or create a new patient "A" in Client EHR and create a current patient encounter Enter one or more orders for laboratory tests In Client Laboratory Information System (LIS), result these tests. Make note of the LOINC code(s) for each result to determine whether each code is present in the list of reportable codes. Make sure LIS generates HL7 ORU (Result) messages for each patient who has a lab result Run ELR process to send to reportable lab agency (assuming process is batch, rather than real-time).	Environment and patient selected Confirm encounter and order Confirm patient and encounter Confirm order(s) are entered Confirm tests have been resulted Record LOINC code(s) and confirm in list of reportable codes Confirm results messages for each patient Confirm data sent	June, 2023 FALSE
3 4 5 6 7 8 9 10	Implement send-only reportable lab interface (if interface not already in place) Determine whether test or production interface will be used if production, determine whether an actual patient or a test patient will be used Create a new patient encounter and orders for lab tests Register a patient or create a new patient "A" in Client EHR and create a current patient encounter Enter one or more orders for laboratory tests In Client Laboratory Information System (LIS), result these tests. Make note of the LOINC code(s) for each result to determine whether each code is present in the list of reportable codes. Make sure LIS generates HL7 ORU (Result) messages for each patient who has a lab result Run ELR process to send to reportable lab agency (assuming process is batch, rather than real-time). Access agency to verify that reportable lab data was received for patient A.	Environment and patient selected Confirm encounter and order Confirm patient and encounter Confirm order(s) are entered Confirm tests have been resulted Record LOINC code(s) and confirm in list of reportable codes Confirm results messages for each patient Confirm data sent Confirm data received	July, 2023 FALSE July, 2023 FALSE August, 2023 FALSE
3 4 5 6 7 8 9 10	Implement send-only reportable lab interface (if interface not already in place) Determine whether test or production interface will be used if production, determine whether an actual patient or a test patient will be used Create a new patient encounter and orders for lab tests Register a patient or create a new patient "A" in Client EHR and create a current patient encounter Enter one or more orders for laboratory tests In Client Laboratory Information System (LIS), result these tests. Make note of the LOINC code(s) for each result to determine whether each code is present in the list of reportable codes. Make sure LIS generates HL7 ORU (Result) messages for each patient who has a lab result Run ELR process to send to reportable lab agency (assuming process is batch, rather than real-time). Access agency to verify that reportable lab data was received for patient A. Calculate and compile metrics Attestation: This Real World Testing plan is complete with all required elements, including measures	Environment and patient selected Confirm encounter and order Confirm patient and encounter Confirm order(s) are entered Confirm tests have been resulted Record LOINC code(s) and confirm in list of reportable codes Confirm results messages for each patient Confirm data sent Confirm data received	July, 2023 FALSE July, 2023 FALSE August, 2023 FALSE
